To Whom It May Concern,

I have been working with Stavros Rekaris in a professional capacity for a number of years through two avenues. The first is through his project management work and the second is through his engineering design work.

1. Costa Rico Constructions Pty Ltd

Costa Rico Constructions were the builders of the Bunker Freight Lines and the Catholic Church in Campbellfield. Stavros Rekaris was Costa Rico Constructions representative. My Company carried out the fit-out work.

I was involved with Stavros from the initial tendering stage through to the end of construction. Stavros would frequently be on site giving either myself or my foreman directions and answering any questions that we may have. Stavros was also my direct contact for progress payments and assessing the progress of my work. In both these projects, the value of our contract was in the hundreds of thousands of dollars.

I found Stavros professional, thorough and constantly displays his knowledge in construction techniques and procedures.

2. H.S. Rekaris and Associates Pty Ltd

I have been directly involved with Stavros Rekaris in the design of many projects over the years. Most recently I have awarded his company the design of the 6th floor extension of the Manningham Medical Centre and the new Hydralight building in Epping. In both cases, Stavros had direct discussions with the building owners, subcontractors and myself discussing techniques and determining the most appropriate construction method for complicated engineering and building situations.

Stavros and his company H.S. Rekaris & Associates were responsible for all of the documentation throughout the \$1.8million Hydralight building in Epping – from the town planning applications through to obtaining the building permit.

Stavros led the development of the architectural drawings and engineering plans for the \$550,000.00 works in the Manningham Medical Centre.

I have always found his drawings to have been thorough and detailed and I have not encountered any problems with his or his company's work.

Feel free to contact me on the number above if you have any queries.

Regards,

Russell Gordon
