## OCCUPATIONAL HEALTH & SAFETY CONSULTANTS

March 17, 2008

To whom it may concern

As the project Occupational Health and Safety Consultant for Costa Rico Pty Ltd I have worked with Stavros Rekaris on three large building projects in Melbourne.

The projects were a truck depot at Fulton Drive in Derrimut, a warehouse and truck depot at Marwen Drive in Derrimut and a uniquely designed church at Sommerset Road in Campbellfield.

Stavros held both an on-site management and office management role on each of the projects and my role was to conduct regular independent health and safety audits of each site and provide both health and safety advice and an independent health and safety report on the sites.

I found the sites very well organized and where necessary Stavros responded to all health and safety recommendations made in a positive manner to ensure the sites met all current Occupational Health and Safety requirements.

On this basis I have no hesitation in recommending Stavros Rekaris for his Commercial Builders Licence.
